

The Year of the Nursery Product Recall

A look at children's product recalls in 2009 and
changes in children's product safety

Executive Summary

Since 2002, Kids In Danger (KID) has released an annual report detailing children's product recalls throughout the previous year. This year's report examines children's product recalls in 2009 and recall accountability in terms of actions taken by the U.S. Consumer Product Safety Commission (CPSC) towards violators of product safety regulations.

Findings of the report include:

- Forty-one percent (143) of the products recalled by CPSC were children's products.
- For the first time, nursery products were the most-recalled category with 28% of children's recalls.
- There were six recalls of 1 million or more units, totaling over 21 million units of recalled children's products.
- Nursery products had the most injuries prior to recall. Evenflo's Envision High Chairs were the product with the most injuries prior to recall (54).
- There were nine deaths reported prior to recall in these products. Seven of the deaths occurred in sleep environment products, while one involved a toy and another involved clothing.
- Twenty sleep environment products were recalled, including four drop-side cribs that led to the deaths of five infants.
- CPSC imposed a total of \$30.7 million in fines for companies who violated safety regulations, mostly for excessive lead in toys and drawstrings in children's clothing.

KID recommends:

- CPSC should continue working on the public database required by the Consumer Product Safety Improvement Act (CPSIA) so that consumers have access to important information they need to keep children safe.
- Congress should require annual reports on recalls and their effectiveness.
- CPSC should require more aggressive outreach by companies following a recall, and require a replacement product or refund.
- CPSC should continue their work on mandatory standards for durable infant and toddler products.

KID concludes these findings with suggestions for parents and caregivers including: checking www.cpsc.gov for recall reports, spreading the word to family and friends, and staying updated with www.KidsInDanger.org. The full report is available for download at www.KidsInDanger.org or by calling KID at 312.595.0649.

Introduction

Kids In Danger's (KID) annual children's product hazard reports examine data and trends in children's products that have been recalled by the U.S. Consumer Product Safety Commission (CPSC) each year. The report for 2009 reveals some consistent trends from previous years, but also highlights new hazards, including nursery products and children's clothing. Nursery products were the most-recalled product category in 2009, including several dangerous sleep environment products such as drop-side cribs and baby hammocks that caused five infant deaths. CPSC's response in the wake of the two biggest years for children's product recalls (2007 and 2008) is discussed as well.

Changes at CPSC

CPSC experienced a year of new beginnings in 2009. In June, Inez Tenenbaum was confirmed as the new chair of CPSC. Ms. Tenenbaum was chosen by President Obama and received full senate confirmation. In August, two additional commissioners were confirmed, giving the CPSC a total of five commissioners to better carry out the agency's mission to oversee product safety for all consumers.

Notably, August 14, 2009 marked the Consumer Product Safety Improvement Act's (CPSIA) one-year anniversary and the effective date for several new provisions of the Act. Total allowable lead content dropped from 600 parts per million to 300 ppm. CPSC's limit on civil penalties for companies in violation of safety standards rose from \$1.8 million to \$15 million. New tracking labels will be included on children's products to help both consumers and manufacturers react efficiently in the event of a recall. Finally, the catalog labeling provision will require warning labels to be included on children's products in print catalogs and on the internet.

In addition, in 2009 CPSC began their work promulgating mandatory standards for durable infant and toddler products including bath seats, walkers, toddler beds, bassinets and cribs. Mandatory standards and other requirements of CPSIA will address many of the hazards seen in this year's recalls.

In August, KID had the opportunity to testify at CPSC's public hearing regarding the agency's priorities and agenda for Fiscal Year 2011. KID's testimony called for increased transparency, stronger mandatory standards for juvenile products, and better recall effectiveness.

2009: Recalls of children's products continue, with slight decrease

In 2009, the CPSC recalled 346 products, 143 of which were children's products, including toys, cribs, strollers, clothing, and outdoor & sports products. With a rate of over 2.7 recalled children's products per week, recalls slowed in 2009 compared with the previous two years. However, this rate is still higher than any year prior to 2007. In total, 21,124,551 children's product units were recalled in 2009.

Table 1: Children's product recalls 2001-2009

| Year | Total Recalls | Total Children's Product Recalls | % Children's Product Recalls | Units of Recalled Children's Products |
|------|---------------|----------------------------------|------------------------------|---------------------------------------|
| 2009 | 346 | 143 | 41% | 21,124,551 |
| 2008 | 394 | 190 | 48% | 18,730,715 |
| 2007 | 448 | 231 | 52% | 46,562,901 |
| 2006 | 318 | 111 | 35% | 18,967,210 |
| 2005 | 329 | 123 | 37% | 27,891,188 |
| 2004 | 277 | 87 | 31% | 156,169,990 |
| 2003 | 214 | 66 | 31% | 6,140,691 |
| 2002 | 210 | 90 | 43% | 11,155,631 |
| 2001 | 214 | 118 | 55% | 22,992,667 |

Nursery products lead children's product recalls for the first time

Nursery products and clothing surpassed toys in 2009 as the leading recalled product types. Toys had been the most recalled product category each year from 2001-2008. In 2009, nursery products – cribs, playpens, strollers, high chairs, and pacifiers for example – accounted for 28% of children's product recalls and 12% of all recalls. Most nursery products were recalled due to entrapment, bodily injury (fall), and choking hazards. Clothing represented 27% of children's product recalls. Clothing posed strangulation and choking hazards due to drawstrings and small parts in most cases. Toy recalls have declined from 41% to 24% of recalls from 2008 to 2009. Most toy recalls present lead poisoning and choking hazards due to small parts. For the first time, CPSC recalled a toy for the presence of phthalates, a substance banned through CPSIA.

Table 2: Recalls by product type in 2009

| Type of Recall | # Recalls | % of Total Recalls | % of Children's Product Recalls | # of Units |
|-----------------------|-----------|--------------------|---------------------------------|------------|
| All Recalls | 346 | 100% | - | - |
| Children's Recalls | 143 | 41% | 100% | 21,124,551 |
| Nursery | 40 | 12% | 28% | 12,203,335 |
| Clothing | 39 | 11% | 27% | 2,452,890 |
| Toys | 35 | 10% | 24% | 4,711,140 |
| Outdoor & Sports | 16 | 5% | 11% | 676,200 |
| Jewelry | 6 | 2% | 4% | 118,236 |
| Art & School Supplies | 4 | 1% | 3% | 941,500 |
| Furniture | 4 | 1% | 3% | 22,850 |

Recalls increase in size

In 2009, there were six recalls of 1 million or more units and ten recalls at least 600,000 units. At the top of the list was a 4-million-unit recall for Aqua-Leisure inflatable baby floats whose leg straps can tear, posing a drowning risk to children. Stork Craft's recall of over 2 million cribs was prompted by the tragic deaths of four infants due to entrapment and strangulation from

faulty drop-side hardware. Other hazards in the largest-unit recalls include bodily injury (fall and laceration) and choking.

Table 3: Top 10 children's product recalls by unit in 2009

| Product | Manufacturer | # Injuries | Hazard | # Units |
|--|--------------------------------|---------------|----------------------------------|-----------|
| Inflatable Baby Floats | Aqua-Leisure Industries | 0 | Drowning | 4,000,000 |
| Drop-Side Cribs | Stork Craft Manufacturing Inc. | 35 (4 deaths) | Bodily Injury (fall), Entrapment | 2,100,000 |
| Little Tikes™ Workshops Sets & Trucks | Little Tikes | 1 | Choking | 1,600,000 |
| Buster Brown & Co.'s Clog Children's Shoes | Brown Shoe Company Inc. | 0 | Choking | 1,400,000 |
| Kolcraft Play Yards | Kolcraft Enterprises Inc. | 21 | Bodily Injury (fall) | 1,000,000 |
| Maclaren Umbrella Strollers | Maclaren USA Inc. | 12 | Bodily Injury (laceration) | 1,000,000 |
| Solar System Kits & DNA Kits | FloraCraft Corp. | 0 | Lead Poisoning | 930,000 |
| State Farm Good Neigh Bears | State Farm | 0 | Choking | 827,000 |
| Envision™ High Chairs | Evenflo Co. Inc. | 54 | Bodily Injury (fall), Choking | 643,000 |
| "Bobby Chupete" Pacifiers | Grand World Inc. | 0 | Choking | 641,000 |

Several manufacturers had multiple product recalls

Fifteen manufacturers reported more than one recall and four manufacturers had three or more recalls. Dorel Juvenile Group and Evenflo Co. Inc. had five different product recalls each. Simplicity Inc./SFCA Inc. and The Land of Nod each had three separate recalls. The recalled products of these four companies created entrapment, fall, and choking hazards to children.

Table 4: Multiple recalls by manufacturer in 2009

| Manufacturer | # Recalls | # Units | Hazards | Injuries |
|--------------------------------|-----------|-----------|----------------------------------|---------------|
| Dorel Juvenile Group | 5 | 868,100 | Bodily Injury (fall), Entrapment | 3 |
| Evenflo Co. Inc. | 5 | 1,037,000 | Bodily Injury (fall), Choking | 74 |
| Simplicity Inc./SFCA Inc. | 3 | 625,000 | Bodily Injury (fall), Entrapment | 5 (1 death) |
| The Land of Nod | 3 | 3,650 | Choking, Entrapment, Fall | 0 |
| Daiso California LLD | 2 | 560 | Choking, Lead Poisoning | 0 |
| Infantino LLD | 2 | 315,000 | Choking | 0 |
| Jardine Enterprises | 2 | 152,450 | Entrapment | 1 |
| Jason Evans Assoc. LLC | 2 | 19,600 | Strangulation | 0 |
| La Jolla Sport USA | 2 | 12,000 | Strangulation | 0 |
| LaJobi Inc. | 2 | 4,900 | Bodily Injury (fall), Entrapment | 1 |
| Little Tikes | 2 | 1,601,950 | Bodily Injury (fall), Choking | 1 |
| OKK Trading | 2 | 24,900 | Choking | 0 |
| Stork Craft Manufacturing Inc. | 2 | 2,635,000 | Bodily Injury (fall), Entrapment | 36 (4 deaths) |
| Target | 2 | 653,000 | Bodily Injury (fall), Burn | 4 |
| Team Work Trading | 2 | 2,900 | Lead Poisoning | 0 |

Bodily injury is leading hazard in recalls

In 2009, bodily injury (falls, laceration, and impact hazards) accounted for 29% of the hazards in children’s product recalls, with 41 products recalled for this hazard, totaling over 11 million units. Choking represented 24% of hazards in recalls and poisoning represented 20%. This year saw a rise in recalls for strangulation hazards, up to 19%, largely due to drawstrings in children’s clothing. Entrapment, particularly in sleep environments such as cribs, remains a serious risk representing 14% of hazards in children’s product recalls.

Table 5: Children’s product recalls by hazard type (2009)

| Hazard | # of Recalls | % of Children's Product Recalls | # of Units | % of Recalled Units |
|--|--------------|---------------------------------|------------|---------------------|
| Bodily Injury (fall, impact, laceration)** | 41 | 29% | 11,311,735 | 54% |
| Choking | 34 | 24% | 6,186,140 | 29% |
| Poisoning | 28 | 20% | 1,464,006 | 7% |
| Strangulation | 27 | 19% | 665,020 | 3% |
| Entrapment | 20 | 14% | 3,742,135 | 18% |
| Burn*** | 7 | 5% | 899,100 | 4% |

*Note that % of recalls and % of recalled units add to more than 100% because some recalls had multiple hazards.

**Includes one drowning hazard

***Includes one electric shock hazard

Made in China

While children’s products on this year’s recall list originated in 24 different countries, the majority once again came from China. Chinese factories made 105 recalled products, 73% of recalls. Recalled U.S.-made products increased in 2009 to 13 recalls, representing 9% of children’s recalled products. Pakistan, Vietnam, India, and Colombia also had multiple recalls of products originating in their countries. Recalled products made in the USA included mostly clothing and outdoor & sports products such as swing sets, play sets, sweatshirts, and jackets that posed bodily injury and strangulation risks. Chinese-made products represented 88% of choking hazard recalls and 86% of poisoning hazard recalls.

How many incidents does it take to get to a recall?

In 2009 there were 4,616 incidents reported prior to recall for the 143 children’s product recalls. This is more than double the number of incidents prior to recall in 2008. Reported incidents mean that a product has failed in a way that creates a hazard, or a consumer has reported the product as hazardous. Reported incidents can include injury and even death. This year Adventure Playsets waited to enact a recall of their wooden play sets until 1,400 incidents had been reported! The Simplicity Inc. recall of Rainforest Play Yards also included 1,350 incidents prior to recall. As detailed below, two companies received between 300 and 400 incident reports before they recalled their products, and four additional companies received between 100 and 300 incident reports before they too decided to recall their hazardous products.

Table 6: Children’s products with most incidents reported before recall (2009)

| Manufacturer | Product | # Incidents | Hazards |
|--------------------------------|---------------------------------|-------------|------------------|
| Adventure Playsets | Wooden Play Sets | 1,400 | Fall |
| Simplicity Inc. & SFCA Inc. | Rainforest™ Portable Play Yards | 1,350 | Fall, Entrapment |
| Kolcraft Enterprises Inc. | Kolcraft Play Yards | 347 | Fall |
| Evenflo Co. Inc. | Envision™ High Chairs | 333 | Fall, Choking |
| Skywalker Holdings LLC | 13-foot Square Trampolines | 250 | Fall |
| Evenflo Co. Inc. | Majestic™ High Chairs | 161 | Fall, Choking |
| Bugaboo Design & Sales | Bugaboo Bee Strollers | 121 | Bodily Injury |
| Stork Craft Manufacturing Inc. | Drop-Side Cribs | 110 | Fall, Entrapment |
| Dorel Juvenile Group | Infant Car Seats/Carriers | 77 | Fall |
| Infantino LLC | Infant Toys | 45 | Choking |

Nearly 200 injuries occurred before public was alerted to the hazard

Injuries from recalled children’s products totaled 198 before these hazardous products were recalled. Seventeen percent of children’s product recalls involved injuries prior to recall. Nursery products had the most recalls with prior injuries, 35%, followed by outdoor & sports products and furniture, each with 25% of their recalls involving injury prior to recall.

Table 7: Injuries prior to recall by product type

| Type | Recalls | Recalls with Injuries | % of Recalls Involving Injuries | Total Injuries |
|-----------------------|---------|-----------------------|---------------------------------|----------------|
| Children's Recalls | 143 | 25 | 17% | 198 |
| Nursery | 40 | 14 (7 deaths) | 35% | 158 |
| Clothing | 39 | 1 (death) | 3% | 1 |
| Toys | 35 | 6 (1 death) | 17% | 16 |
| Outdoor & Sports | 16 | 4 | 25% | 20 |
| Jewelry | 6 | 0 | 0 | 0 |
| Art & School Supplies | 4 | 0 | 0 | 0 |
| Furniture | 4 | 1 | 25% | 4 |

For the third year in a row, an Evenflo product has caused the most injuries prior to recall – the Envision high chair was responsible for 54 injuries. Stork Craft drop-side cribs were responsible for 35 injuries prior to recall and Kolcraft play yards had 21 reported injuries prior to recall. There were nine deaths in recalled children’s products in 2009. These deaths occurred in five different products, including three sleep environment products.

Table 8: Products involving the most injuries prior to recall (2009)

| Manufacturer | Product | # of Injuries | Type of Injury |
|--------------------------------|---|---------------|---|
| Evenflo Co. Inc. | Envision™ High Chairs | 54 | Bumps and bruises to head, abrasions and pinches |
| Stork Craft Manufacturing Inc. | Drop-Side Cribs | 35 | Entrapment; falls from crib leading to concussion, bumps, and bruises |
| Kolcraft Enterprises Inc. | Kolcraft Play Yards | 21 | Bumps, scrapes, bruises, and concussion |
| Adventure Play Sets | Wooden Play Sets | 16 | Arm fractures, lacerations, scrapes, and bruises |
| Maclaren USA, Inc. | Umbrella Strollers | 12 | Fingertip amputations |
| Evenflo Co. Inc. | Activity Centers | 10 | Broken collarbone, bumps, and bruises |
| Evenflo Co. Inc. | Majestic™ High Chairs | 10 | Bumps and bruises to head, and abrasions |
| Build-A-Bear Workshop® | Folding Toy Beach Chair for Stuffed Animals | 8 | Finger bruises, pinches, and cuts |
| Simplicity Inc. and SFCA Inc. | Rainforest™ Portable Play Yards | 5 | Broken bones, concussion, cuts, bumps, and bruises |
| Big Lots Stores Inc. | Wooden Bunk Beds | 4 | Minor injuries from falls |

Table 9: Products involving deaths prior to recall (2009)

| Manufacturer | Product | # of Deaths | Hazard |
|--------------------------------|---|-------------|------------------|
| Stork Craft Manufacturing Inc. | Drop-Side Cribs | 4 | Fall, Entrapment |
| Amby Baby USA | Amby Baby Motion Beds | 2 | Entrapment |
| OKK Trading | "Action Team" Toy Dart Gun Set | 1 | Choking |
| Simplicity Inc. & SFCA Inc. | Simplicity Drop-Side Cribs | 1 | Entrapment |
| Hill Sportswear Inc. | Kid Pullover Sweatshirt with Hood and Kid Zipper Sweatshirt with Hood | 1 | Strangulation |

Sleep environment products remain a serious hazard

In 2009, CPSC recalled 20 sleep environment products, totaling over 4.7 million units, nearly 2,000 reported incidents, and 75 injuries and deaths. Seven out of the nine deaths in children's products occurred in sleep environment products. Half of the eight recalled cribs feature a drop-side design, which led to five deaths by entrapment. This design has proven to be so dangerous that CPSC is now considering a ban on drop-side cribs. Concern about baby hammocks and motion beds has also increased this year, stemming from two infant deaths from entrapment and suffocation in Amby Baby Motion Beds, and leading to four recalls for this product type.

Table 10: Sleep environment recalls in 2009

| Product | Hazard | Units | Incidents | Injuries/Deaths |
|--|------------------------|------------------|-------------|-------------------------|
| Stork Craft Drop-Side Cribs | Fall, Entrapment | 2,100,000 | 110 | 39 (including 4 deaths) |
| Kolcraft Play Yards | Fall | 1,000,000 | 347 | 21 |
| Stork Craft Baby Cribs | Entrapment | 535,000 | 10 | 1 |
| Simplicity Drop-Side Cribs | Entrapment | 400,000 | 25 | 1 death |
| Dorel Play Yards with Bassinets | Entrapment | 213,000 | 0 | 0 |
| Simplicity Rainforest™ Play Yards | Entrapment | 200,000 | 1,350 | 5 |
| Jardine Cribs | Entrapment | 96,000 | 31 | 1 |
| Dorel Eddie Bauer Soothe & Sway Play Yards | Entrapment | 76,600 | 10 | 0 |
| Jardine Cribs | Entrapment | 56,450 | 19 | 0 |
| Simplicity Travel Tender Play Yards | Entrapment | 25,000 | 5 | 0 |
| Amby Baby Motion Beds | Entrapment/Suffocation | 24,000 | 2 | 2 deaths |
| Big Lots Wooden Bunk Beds | Fall | 20,000 | 14 | 4 |
| LaJobi Bonavita "Hudson" and Babi Italia "Pinehurst" Drop Side Cribs | Entrapment | 2,900 | 33 | 1 |
| LaJobi Bonavita "Cabana" Drop Side Cribs | Entrapment | 2,000 | 16 | 0 |

| Three Sisters Toys Yayita Baby Hammocks | Fall, Entrapment | 20 | 0 | 0 |
| Total | | 4,755,585 | 1974 | 75 |

Re-announcements of crib recalls

In 2009, CPSC re-announced two previously reported crib recalls due to concerns about recently-reported deaths, and to warn consumers against buying these products in second-hand stores. CPSC re-announced its August 2008 recall of Simplicity Inc.'s close-sleeper bassinets after learning of two additional infant deaths, bringing the total death toll from this product to four infants. CPSC and LaJobi Inc. re-announced the December 2001 recall of "Molly" and "Betsy" cribs to alert consumers who may still have the cribs in their homes to discontinue use, and to warn second-hand retailers to remove these cribs from sale.

Companies pay increased penalties in 2009

The CPSC is increasingly holding companies accountable for allowing unsafe products to reach store shelves and the homes of millions of children. In 2009, 34 of the 38 total civil penalties imposed on companies were for children's products, adding up to approximately \$30,739,000. Mattel/Fischer Price received the largest penalty with a \$2.3 million settlement for violating the federal lead paint ban on children's toys. Companies who failed to report unsafe drawstrings on children's clothing and those who violated the lead paint ban for children's toys received the majority of the penalties.

2010 Update: In March of 2010, CPSC fined Daiso Holding USA Inc. for \$2.05 million and issued an unprecedented "consent decree" in response to violations that included distributing and selling toys with illegal levels of lead and phthalates, small parts on toys for young children, and products without warning labels. The consent decree prohibits Daiso from importing or selling any products until they implement a comprehensive product safety program and all of its toys meet federal safety standards. CPSC's actions display increased assertiveness in enforcing product safety laws and send a clear message to manufacturers that safety must come first.

Conclusion

This report highlights both concerns and successes regarding children's product recalls in 2009. The high number of children's products recalled in 2009, especially those that caused injuries and deaths, remains a serious concern. Specifically, the increase in recalls for nursery products, especially dangerous sleep environment products, and children's clothing underscores the need for stronger mandatory safety standards on all children's products. CPSC's increased enforcement of product safety laws signals what is hopefully the start of an era of stricter accountability for children's product manufacturers. However, in the area of recall effectiveness much work remains.

- CPSC should continue planning the public database required by CPSIA. Given companies' lack of compliance with self-reporting measures and delays between injuries and recalls, consumers need access to more information to spot potential hazards and injury trends.
- To improve recall effectiveness, Congress should call for annual reports on the year's recalls and their effectiveness. Only under public scrutiny will companies put more effort into removing recalled items from homes and childcare facilities.

- CPSC should also require more from companies in the event of a recall. In addition to the mandatory recall requirements and product registration cards required by CPSIA, CPSC should require more aggressive outreach after a recall and require a replacement product or refund when possible, increasing the likelihood of retrieval.
- Given the number of nursery product recalls and the number of deaths and injuries involved, CPSC should continue with the mandatory standard rule making and consider much tougher standards for products with poor track records such as high chairs, strollers, play yards and cribs.

Action for Parents and Caregivers

KID urges every parent and caregiver to take the following **three steps to protect children in their care**.

1) *Be aware of the problem:* Visit www.KidsInDanger.org for more information on children’s product safety and to sign up for free email alerts to stay up-to-date on recalled products. Consumers can also sign up at www.cpsc.gov to receive notice of recalls by email.

2) *Always check products:* Take an inventory of the products used with children—at home, at childcare, and elsewhere—and check it against the list of recalls at www.cpsc.gov. Check for safety information on car seats at the National Highway Traffic Safety Administration (NHTSA), www.nhtsa.gov. Repeat the check every time a child receives a new product, gift, or hand-me-down. Report any injuries or problems with products to both the manufacturer and CPSC.

3) *Spread the word:* After learning of a recall, share the news with friends and family and urge them to pass it along. Always fill out product registration cards so manufacturers can send recall information. Under CPSIA, product registration cards and online registration are required for durable infant and toddler products.

Also, take special precautions with sleep environments. Visit KID’s product hazard pages on cribs, portable cribs, bassinets, and soft bedding to learn how to provide a safe place for baby to sleep. Report any product that breaks or appears dangerous so that CPSC is aware of the problem.

Become an Advocate: Let local, state, and national lawmakers know that children’s product safety is important. Find out more at www.KidsInDanger.org advocacy pages.

Methodology

Kids In Danger obtained all recall information for this report from monthly lists of press releases generated by the CPSC and issued jointly by product manufacturers and the CPSC. Press releases outline the incidents, failures, and injuries caused by the product prior to the date of recall. All numbers, facts, and figures contained in this report originated in these press releases. Manufacturers have editorial power over the form of the recall release – so it is not certain that these are all the known incidents, just that these were reported. Only children’s products under the jurisdiction of the CPSC were considered. This excludes car seats and booster seats

regulated by NHTSA. However, CPSC does have oversight of car seats that also function as infant carriers.

Definitions

A children's product is defined as any product designed or intended for the care of or use by children. Products that pose potential dangers to children but that are not intended for their use, such as cigarette lighters with faulty child resistance locks, are not counted as children's products. Children's products were further categorized for this report by the type of product (clothing, furniture, nursery products, sports and outdoor, jewelry, art and school supplies, and toys). The product name, manufacturer, date of recall, number of units recalled, type of hazard posed, and number of incidents and injuries were also recorded for children's products recalled in 2009 (Appendix A).

About Kids In Danger

Kids In Danger (KID) is a nonprofit organization dedicated to protecting children by improving children's product safety. KID was founded in 1998 by Linda Ginzel and Boaz Keysar after the death of their 16-month-old son, Danny, in a dangerous portable crib. For more information, call 312.595.0649 or visit www.KidsInDanger.org.

Appendix A: 2009 Children's Product Recalls

| Date | Manufacturer | Product | Product Type | Hazard | Hazard Type | Units Recalled | Incidents | Injuries |
